

Software «Document Builder»

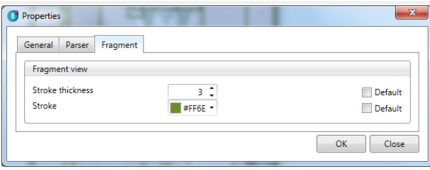

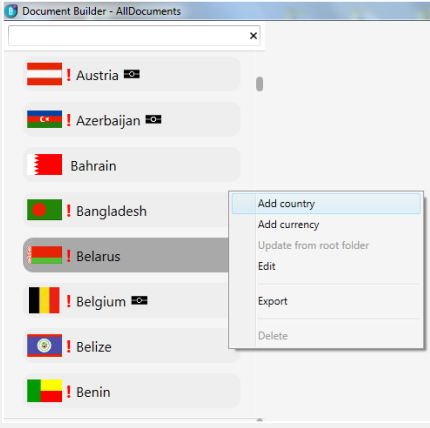

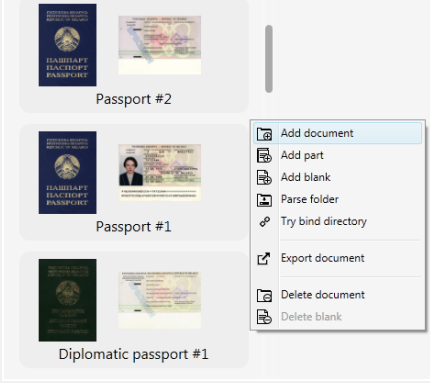

Document Builder is intended for express authenticity verification and advanced examination of passports, ID cards and other travel documents, driver's licenses, vehicle registration certificates and other vehicle related documents.

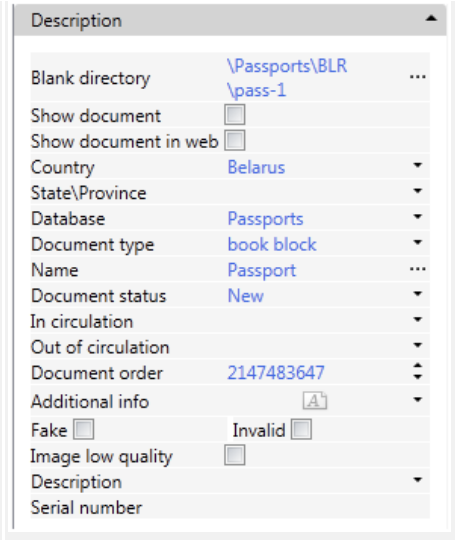

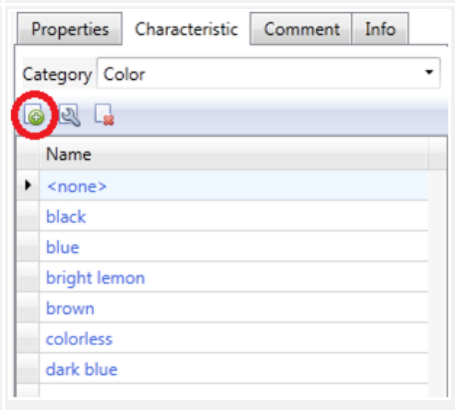

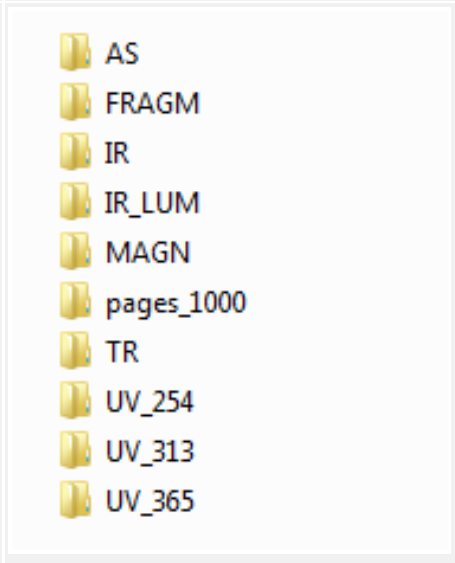

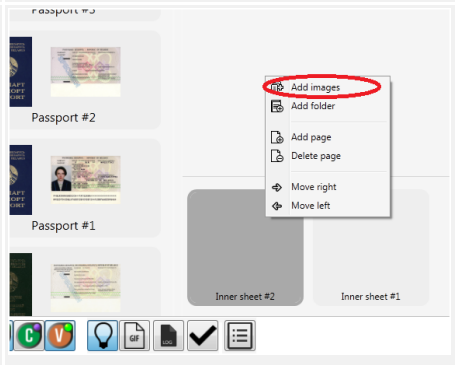

Document Builder is an additional information reference system module which allows adding documents (visas, passports, driver’s licenses, ID cards, banknotes, etc.) with images and descriptions.

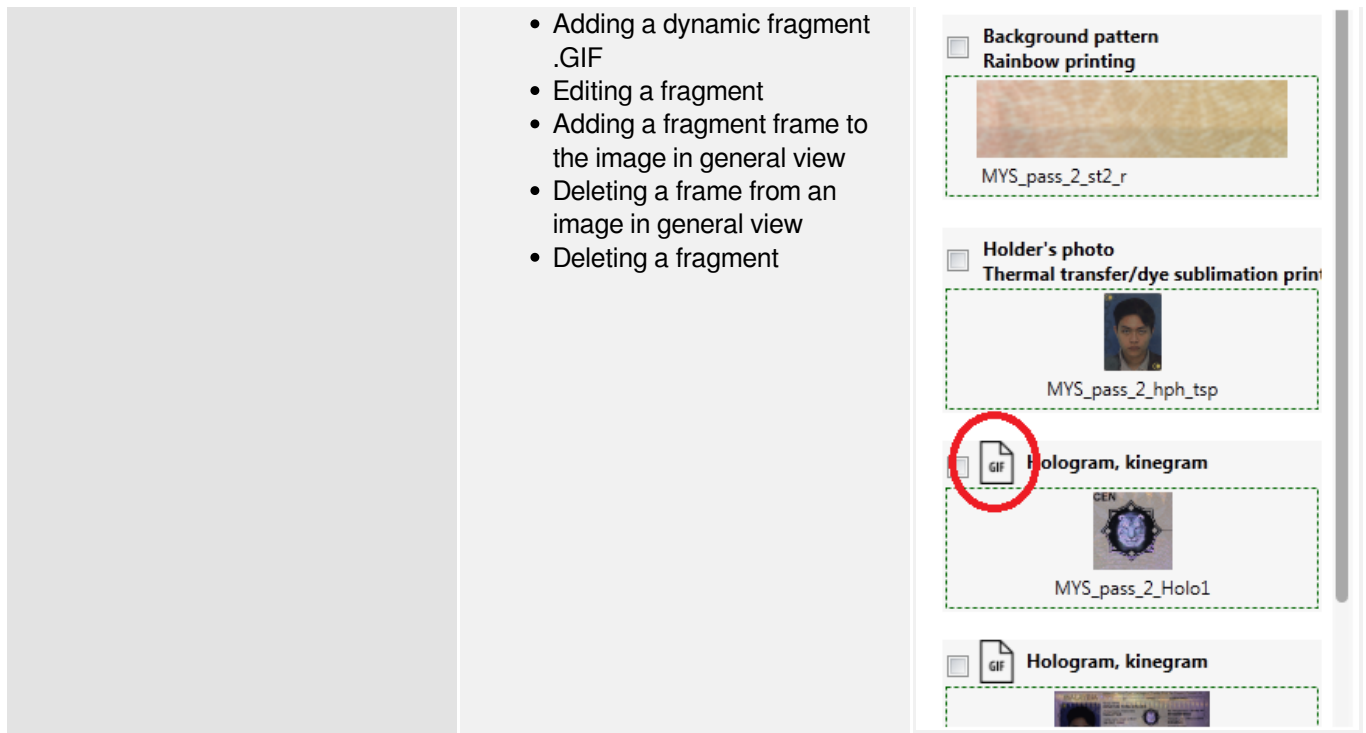

Functionality

- Possibility to add to database additional information on documents, as well as separate security elements
- The module is created with a multilingual user friendly interface
- Distant training for systems operation
